Kamil Brzuszczak

CV BUILD 2/4
HYBRID

SEO & Marketing Specialist × AI Integrator

The Google ecosystem (Ads / GA4 / GTM / GSC) wired into Claude and the MCP protocol — I design SEO and marketing for 2026: automation, AI agents and answer search, not just links.

8+	16h → 12s	248	5
years of SEO, marketing and premium e-commerce	brand visibility audit after deploying an AI agent	high buying-intent keywords found outside the TOP10	AI and automation systems designed and shipped solo

Profile

Since 2018 I have owned visibility and conversion for a premium e-commerce brand across the full Google ecosystem — from Google Ads strategy and Merchant Center feed optimisation, through technical SEO and content, to conversion analytics architecture in GTM, GA4 and Search Console.

For the last two years I have extended this with AI engineering: I design integrations built on the Model Context Protocol (MCP), the Claude/Anthropic API and RAG systems that wire marketing data (Google Ads, GA4, GSC) into language models — automating SEO audits, competitor analysis and decision reporting. The result: marketing decisions in seconds, not days, and brand visibility built in Google and in AI-generated answers at the same time.

Experience

audioplaza.pl — leading Polish premium e-commerce brand (Hi-Fi / High-End Audio)

2015 – present · Poznań / Wrocław

Marketing Lead, SEO & E-commerce Visibility — since 2018

- Owning the full Google ecosystem: Ads (campaign structure, budgets, ROAS optimisation), Merchant Center (product feed health) and Google Business Profile.
- Conversion analytics architecture: implementing and maintaining GTM and GA4 (e-commerce events), monitoring in Search Console (visibility, indexing, Core Web Vitals).
- Technical and content SEO for a premium brand — maximising campaign ROI and organic visibility in the competitive Hi-Fi/High-End niche.
- A multi-agent product-description pipeline (classifier → SEO copywriter → reviewer) with a JSON contract and per-category rules.
- Since 01.2026 the role also covers IT and automation: server infrastructure, network security and databases, plus automating operations with Google APIs and AI models (Claude/LLM) — joining marketing and operational data into one decision system.
- Configuring and maintaining VoIP telephony (3CX PRO, SIP trunking) connecting the Poznań and Wrocław branches.

Key B2B Accounts — since 2021

- Long-term relationships with premium clients, technical consulting, project pricing and negotiating high-value contracts.

Client Advisor / Direct Sales — since 2015

- Selling and configuring premium stereo systems — the foundation of my understanding of the premium customer journey.
- Responsible for opening and growing the new showroom (Wrocław): marketing, recruitment and team training.

kbrz77.pl — own consulting brand — AI integrations for SMEs

2025 – present · remote, Poland

AI Engineer & AI Integrator (MCP) — since 2025

- Designing and deploying AI integrations for SMEs: MCP ecosystems (FastMCP), AI gateways (OpenClaw), RAG knowledge bases on company documents.
- SEO aIdeas: an autonomous brand-visibility auditor (Serper API + Claude) — audit from 16 h to 12 s, 248 buying-intent keywords outside the TOP10.
- SEO and Google Ads agency audits: verifying results via GA4, GTM and Search Console, automating SEO content with LLMs.

Approach — SEO and marketing for 2026

Search is turning from a list of links into a conversation with an AI agent. I see the SEO/marketing role in 2026 as wider than classic rankings: it also means Answer Engine Optimization — designing content and structured data so the brand is cited by Google AI Overviews and language models. I treat AI as a working tool, not only something to optimise for — I build my own automations that audit visibility, analyse competitors and report faster than any outside team.

Selected projects

SEO aIdeas — own project · brand visibility auditor
`audit: 16 h → 12 s`

KSeF InterGracja — commissioned project · ERP ↔ e-invoicing
`workstation setup: several hours → 30 min`

Offer Maker — sales tool · PDF proposal generator
`proposal: ~15 minutes → 30 s`

Product description pipeline — premium e-commerce · multi-agent content system
`quality control built into the pipeline`

Stock Analyzer — own project · TUI terminal for stock analysis
`stock analysis: 2–3 h → < 45 s`

Web Tools — internal tools portal
`connectivity troubleshooting: down to zero`

Competences

SEO & marketing 2026
Technical SEO · Answer Engine Optimization (AEO) · AI Overviews optimisation · Core Web Vitals · Structured data (Schema.org) · Content & link building · CRO · Brand visibility audits · E-commerce strategy

Google ecosystem & analytics
Google Ads · Google Analytics 4 · Google Tag Manager · Google Search Console · Google Merchant Center · Google Business Profile · Google APIs

AI & integrations
MCP (Model Context Protocol) · FastMCP · Claude / Anthropic API · Claude Code · OpenAI API · RAG · Agentic workflows · OpenClaw · LLM × data automation

Engineering & data
Python 3.13 · FastAPI · Pandas · SQLAlchemy · Gradio · Docker · Git / GitHub · Linux · API automation

Business & management
B2B relationships · Contract negotiation · Team management · Hiring & training · Marketing agency audits

What I bring to a team

Two perspectives
I look at SEO and marketing like a business strategist and configure them like an engineer — when an off-the-shelf tool falls short, I build my own.

Automating the pain away
Reports and audits that take hours elsewhere take seconds here — because an analyst's time costs more than CPU time.

A translator between worlds
I speak the boardroom's language (ROI, margin, B2B contracts) and the language of data (GA4 events, APIs, MCP) — and translate between them.

Accountable for results, not demos
The systems I design run in production and have a measured business effect — they are not a one-meeting demo.

Education

Journalism and Social Communication
`Adam Mickiewicz University, Poznań, 2012 — BA`
Additional studies: Czech philology, film studies.

A toolkit for communicating and translating complex technical topics into business language. I build my technical knowledge (Python, APIs, MCP) and Google Ads/Analytics expertise through continuous self-study and production deployments.
