Kamil Brzuszczak

CV BUILD 3/4
ENGINEER

AI Engineer & AI Integrator (MCP)

I design and ship AI integrations that work inside a business: MCP ecosystems, AI gateways and RAG systems on company knowledge — with measured results, not demos.

8 shipped projects — from ERP integrations to own websites	**16h → 12s** brand visibility audit after deploying an AI agent	**45s** stock analysis instead of 2–3 hours (Stock Analyzer)	**30min** KSeF workstation setup instead of several hours

Profile

Since 2025, under the kbrz77.pl brand, I design and ship AI integrations for SMEs: MCP servers (FastMCP) that connect LLMs to company data, RAG knowledge bases, agents running multi-step tasks and office automation. At audioplaza.pl I automate operations with Google APIs and Claude models, joining marketing and operational data into one decision system.

I have built and run in production, among others: a Subiekt GT ERP ↔ KSeF integration, an autonomous SEO auditor (16 h → 12 s), a multi-agent content pipeline with a JSON contract, a PDF proposal generator and an internal tools portal. My background is marketing and journalism — so I start from the process and the business outcome, and pick the technology to fit the problem.

Experience

kbrz77.pl — own consulting brand — AI integrations for SMEs

2025 – present · remote, Poland

AI Engineer & AI Integrator (MCP) since 2025

- Designing and deploying AI integrations for SMEs: MCP ecosystems (FastMCP), AI gateways (OpenClaw), RAG knowledge bases on company documents.
- Office automation: lead classification and offer generation, AI agents running multi-step tasks (email, CRM/ERP, documents).
- KSeF InterGracja: integrating the Subiekt GT ERP with the National e-Invoicing System — from setup wizard to Windows installer; a workstation in 30 min, zero invoice errors.
- SEO aIdeas: an autonomous brand-visibility auditor (Serper API + Claude) — audit from 16 h to 12 s, 248 buying-intent keywords outside the TOP10.

audioplaza.pl — leading Polish premium e-commerce brand (Hi-Fi / High-End Audio)

2015 – present · Poznań / Wrocław

Marketing Lead, SEO & E-commerce Visibility since 2018

- Since 01.2026 the role also covers IT and automation: server infrastructure, network security and databases, plus automating operations with Google APIs and AI models (Claude/LLM) — joining marketing and operational data into one decision system.
- A multi-agent product-description pipeline (classifier → SEO copywriter → reviewer) with a JSON contract and per-category rules.
- Internal tools: a PDF proposal generator (a proposal in 30 s), the Web Tools portal with single sign-on, a two-branch cash report (reconciliation 75% faster).
- Configuring and maintaining VoIP telephony (3CX PRO, SIP trunking) connecting the Poznań and Wrocław branches.
- Conversion analytics architecture: implementing and maintaining GTM and GA4 (e-commerce events), monitoring in Search Console (visibility, indexing, Core Web Vitals).

Key B2B Accounts since 2021

- Long-term relationships with premium clients, technical consulting, project pricing and negotiating high-value contracts.

Client Advisor / Direct Sales since 2015

- Selling and configuring premium stereo systems — the foundation of my understanding of the premium customer journey.

Selected projects

KSeF InterGracja — commissioned project · ERP ↔ e-invoicing
`workstation setup: several hours → 30 min`

Product description pipeline — premium e-commerce · multi-agent content system
`quality control built into the pipeline`

SEO aIdeas — own project · brand visibility auditor
`audit: 16 h → 12 s`

Stock Analyzer — own project · TUI terminal for stock analysis
`stock analysis: 2–3 h → < 45 s`

Offer Maker — sales tool · PDF proposal generator
`proposal: ~15 minutes → 30 s`

Web Tools — internal tools portal
`connectivity troubleshooting: down to zero`

Competences

AI & integrations
MCP (Model Context Protocol) · FastMCP · Claude / Anthropic API · Claude Code · OpenAI API · RAG · Agentic workflows · OpenClaw · LLM × data automation

Engineering & data
Python 3.13 · FastAPI · Pandas · SQLAlchemy · Gradio · Docker · Git / GitHub · Linux · API automation

Infrastructure
3CX PRO VoIP · SIP trunking · Tailscale VPN · Raspberry Pi · Backups (Borg) · Network security

Google ecosystem & analytics
Google Ads · Google Analytics 4 · Google Tag Manager · Google Search Console · Google Merchant Center · Google Business Profile · Google APIs

Business & management
B2B relationships · Contract negotiation · Team management · Hiring & training · Marketing agency audits

What I bring to a team

Two perspectives
I look at SEO and marketing like a business strategist and configure them like an engineer — when an off-the-shelf tool falls short, I build my own.

Automating the pain away
Reports and audits that take hours elsewhere take seconds here — because an analyst's time costs more than CPU time.

A translator between worlds
I speak the boardroom's language (ROI, margin, B2B contracts) and the language of data (GA4 events, APIs, MCP) — and translate between them.

Accountable for results, not demos
The systems I design run in production and have a measured business effect — they are not a one-meeting demo.

Education

Journalism and Social Communication
`Adam Mickiewicz University, Poznań, 2012 – BA`
Additional studies: Czech philology, film studies.

A toolkit for communicating and translating complex technical topics into business language. I build my technical knowledge (Python, APIs, MCP) and Google Ads/Analytics expertise through continuous self-study and production deployments.
